Creative Web Developer with curiosity to learn and passion for coding. During my career change goals I am building valued experience working on my projects to enhance my skills and seeking opportunities to become Junior Developer. I am keen to learn and participate in work projects, looking for the perfect opportunity that will assist me in achieving professionalism and dedicate my skills for exploring new opportunity. In return you gain a passionate individual who is keen to grow with the department, years of soft skills harnessed ready to work closely with users to exceed their expectations.
